

# LC02 CONTROLLER

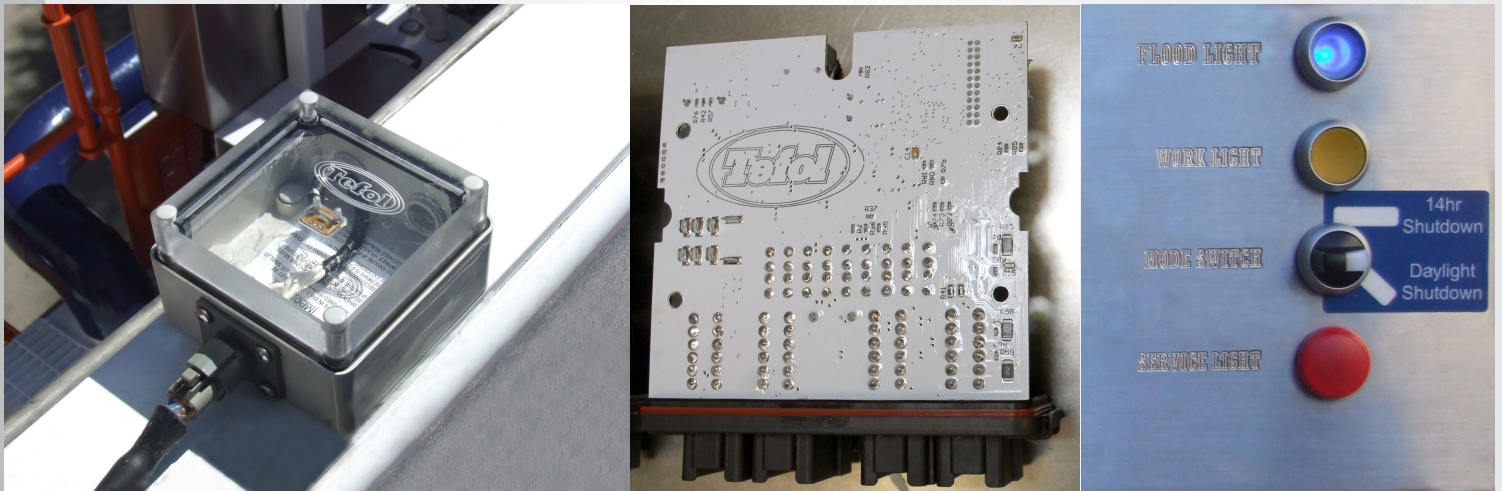

AUTOMATION  
& EFFICIENCY  
SOLUTIONS

***Tefol***

TAKE CONTROL OF YOUR  
LIGHTING TOWERS BY  
DOING NOTHING.

# LC02 CONTROLLER

SAVE TIME & MONEY BY AUTOMATICALLY SHUTTING DOWN YOUR  
LIGHTING TOWERS USING EITHER A CONFIGURED TIME PERIOD  
OR DAYLIGHT SENSING TECHNOLOGY. IT JUST MAKES SENSE.

## KEY FEATURES

Automatic engine shutdown after a configurable period of time.

Automatic engine shutdown after a configured amount of daylight has been detected using PE Cell technology.

Graphical LCD touchscreen for unit operation.

Real-time system voltage monitoring to allow quick and easy monitoring of system charge voltage.

Service hours indicator provides a quick and easy way of identifying if the machine is overdue for a service.

Can be retrofitted to all makes and models of lighting plants from a large voltage range (DC & AC).

Can be customised to suit your specific application.

All critical spares are available from Tefol Pty Ltd.
